

Nitanium Molar Rotator²[™]

Multi-Purpose Finishing Appliance

For patients requiring upper first molar rotation and stabilization

The *Nitanium Molar Rotator*² Appliance provides predictable rotation, torquing and expansion in a pre-programmed appliance.

Advances in thermally activated nickel titanium provide the activating forces in this truly unique appliance. After insertion into the maxillary first molar lingual sheaths, the appliance provides a constant force to ensure the desirable end result.

The *Nitanium Molar Rotator*² Appliance offers many benefits, including the following:

- Slower expansion has shown to lower incidents of relapse*
- Thermally-activated *Nitanium*[®] for total control eliminating patient's compliance
- Ease of placement and removal by the doctor
- Orthology arm and loops provide adjustability for fine-tuning and finishing
- No laboratory work is required – available in 10 sizes
- Excellent for mixed dentition and adolescent cases
- Consistent and predictable end results
